About This Game

Forget what you have learnt in school. Milk does not come from boxes! And now you have the chance to participate on this ancient farm process (at least virtually).

Cow Milking Simulator is a whimsical arcade game. Your mission: milk the cow as fast as you can! Get the milk, sell some dairies, eat cheese, make money. But you have to be quick: a farmer's life is not as chill as you would think!

Cow Milking is a party game in virtual reality, ideal to play and pass with friends, making it a perfect game to show VR for the first time. Collect new products, new hats for your cow and don't forget to milk as fast as you can to mark your name in (leaderboards) history!

I like to think I have a pretty good sense of my RL surroundings when in VR, so when a game gets me involved enough to whack furniture several times with my controlers I feel it is doing something right.

In its current state it isn't a long game, but the experience is satisfying enough that I feel it has decent replay value. This also feels like a good title to have if you enjoy demoing VR to friends.

Worth keeping an eye on at the very least.. I was extremely dissatified with this product, even for being on sale by half it was not worth it.
The reasons are the shear size of the product with it being over 15,000MBs.
Slow to start up and import videos to edit
Videos in different formats that need time to activete to be able to try and edit
Clunky UI that does not show the video playing but I could hear audio
And I've already stated but just how slow it is to start, I have little time to focus on editing and\Vor want to
work on other projects on my limited free time.
I would recommend people trying Movavi Video Editor Plus, it is the same price that this one is on sale, faster to start, and takes up a fraction of space this one takes (no joke 158MBs), has simple layout and instructions so you won't be confused when it first starts out, and the price is reasonable for people on a budget.. its very sad to say this but I dont reccomend this, I love this game for all its worth but the multiplayer was its main strong point but when gamespy shutdown so did its multiplayer. The campaign is pretty fun but once you beat it there is nothing really to do accept naval accademy which is just training. So you can buy it for its singleplayer but sadly there is no multiplayer.. Nice meme bro!. It took me two clicks on Google results to find how to make the game work on Windows 10 and another click to get an HD patch. AMA. stable test server, you can get out fun of it

If you played the original Puzzle Quest but thought it wasn't quite bland enough, then this game is for you!. It's fine.
. It seems to be a good craps simulation but with zero guidance if you don't know the game ... which I do not. I was hoping this game could teach me but I know less now then when I started.. I purchased this game with little expectations(being in beta stage). I only play PVE (single player games). The game had it's issues but I was giving the developers time. One other issue, there is no communication from the developers at all. They just updated the game without the PVE option. I have asked for a refund and highly recommend you do not purchase this game if they are going to make changes like this.. 1.5 points on the epic scale what am i even doig anymor?
. Great music, pixel graphics, a variety of farting sounds and even a storyline.
Real achievements and an happy ending.
Three difficulties and hundreds of screaming people will keep you entertained in this, lets call it indie game.
9/10 for the first playthrough.

Thanks to everyone who saw us at PAX / joined our community:
It was an insanely busy 3-day weekend; during our 4th and final year at PAX Australia

Having the time to meet with developers, journalists and gamers like you was fantastic!
